Grizzly Bear, Black Bear, Moose, Mountain Goat, and Winter Hunting Adventures/Traplines

## ABOUT US

### HISTORY

Although Michael grew up in Germany, he had a lot of exposure to the business, and North America, at a young age. Michael's father started outfitting in Alaska and Canada in the 70's and would occasionally take Michael along. It became clear to him very quickly that British Columbia was where he wanted to live, and outfitting was what he wanted to do.

In 1987, at the age of 19, Michael and his then girlfriend, Manuela, made the move to Canada and never looked back. With their two boys, Rene and Christian, they now run a very successful outfitting operation that spans two guide areas, a fantastic fishing lodge, and a trapline all in Northern BC.

### LOCATIONS

We have 11 different camps in our exclusive 940,000 acre guide area. All but two locations are fly-in camps. The northern part is only 230 miles from the Yukon border and the whole area offers some exceptional moose, goat, and bear hunting.

We are happy to talk to you about our area and the best camp for your hunt expectations. Each camp has its own character and might be better for one species over another.

Moose hunting is conducted throughout both our guide areas. Trembleur Lake and its surrounding area offers excellent moose hunting with chances for big bulls, and our most northern camps offer a classic northern BC moose hunt. We have many moose camp options and hunting methods; some are on foot, some in boat/canoe, ATV or truck. Ask us and we can tell you which camp will be the best suited for your hunting expectations and best matched to your abilities.

## MOOSE HUNTS

## GRIZZLY BEAR HUNTING

Bear River is packed with Chinook - or as some may call them, King Salmon. Grizzly bears love fish but there is one species that they cannot resist, and that is the King Salmon. There are thousands of them in this river splashing and fighting for the best spawning grounds. These fish attract some of the highest numbers of grizzly in the BC interior.

This grizzly hunt is conducted from the river banks, or from our tree stands that are placed at hot-spots. Many of these stands are situated to put the hunter within bow range if needed. A newly constructed log cabin offers a comfortable resting place.

## BLACK BEAR HUNTING

Spring is the best time to hunt black bears with us. Sightings are plentiful and the bear hide is in the best possible condition. We hunt black bears from two of our 11 camps, Sustut Valley and Babine Lake.

The Sustut Valley is in northern BC and is a fly-in camp. To get here, guests fly in to Smithers, BC. We hunt from ATVs and are accommodated in cabins and/or wall tents.

We reach The Babine Lake area by driving from Prince George, BC. Camp consists of comfortable cabins, and fishing is possible from this location. Hunting is conducted by 4x4 vehicle and ATV's.

## MOUNTAIN GOAT HUNTS

Our guiding area has a very healthy mountain goat population with a good age structure. The habitat is at an optimum and produces large record class billies.

Our Alpine Lake camp shown on this picture is our most sought after location and is nothing short of spectacular.

All other goat hunt locations start from a main camp. We then hike up to above the tree line and hunt out of small mountain tents.
